

Laser Phosphor Display Technology Platform

Large format displays typically have been hindered by high-power consumption and limited applicability. Laser Phosphor Display (LPD) technology changes this with its flexible technology platform, characterized by brilliant luminance, scalability, and ultra-low power consumption. When combined with Prysm’s visual collaboration software, the LPD platform can be leveraged for a multitude of use cases, spanning from digital signage, to interactive presentations, and to multi-site team collaboration.

The LPD display platform is ideal for users who want a bezel-free large display (greater than 100”) that extends beyond the current size limitations of OLED and LCD formats, and delivers a comfortable ambient light experience, both for up-close touch interactivity and distance viewing, that current LED and projector technology cannot provide.

“Without exception, everyone who sees the wall is amazed — the impact is immediate and dramatic”

— Kevin McDermond, Program Director, Brand Creative, Under Armour

LPD 6K Series

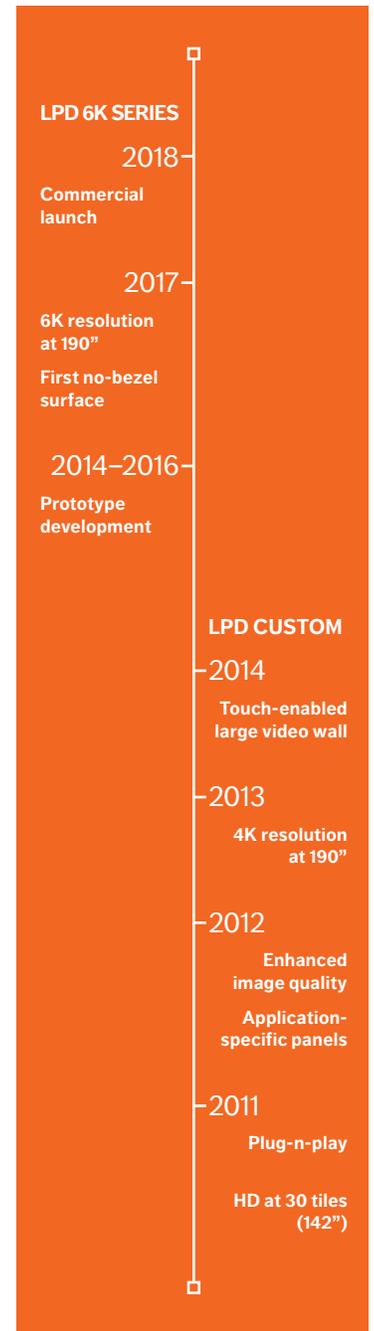

The LPD 6K Series is Prysm’s groundbreaking large-format display. It is the world’s largest single panel display and is available in pre-configured sizes. Offering 6K resolution, the series is fully interactive and supports virtually any commercial use case.

Benefits of the LPD technology platform

<p>Up to 6K Resolution</p> <p>Aided by a high-contrast ratio from light to dark colors, the LPD platform immerses the audience in high-quality content for the best experience</p>	<p>Low Power Consumption</p> <p>Being big doesn’t mean big power bills. The LPD platform can save a company thousands of dollars in utility bills, compared to similar sized screens on different technology platforms</p>
<p>No Bezels</p> <p>Allow content to fully express its brilliant self AND avoid those pesky LED and LCD tile failures</p>	<p>High Pixel Fill-Factor</p> <p>Ensures viewers don’t lose clarity of image or content up close or during distance viewing</p>
<p>Interactive</p> <p>Surface supports full interactive display, capable of supporting up to 32 unique touchpoints simultaneously with Prysm software</p>	<p>Use Case Flexibility</p> <p>Let your video wall be your brand ambassador when needed, but also the workhorse to help teams make decisions faster during meetings</p>
